

Single Shaft Mixer

- The equipment is used for mixing the crushed materials with water added to make sure the materials can absorb the moisture sufficiently, and for mixing two kinds of above crushed materials to make it fully mixed.
- Compared with double shaft mixer, this machine only has one mixing shaft.

Mixing teeth

Primary structure: electromotor, reduction box, triangular belt, mixing teeth

Equipment advantages: mixing uniformity, big production capacity, low failure rate

Technical parameters:

Model	Production Capacity (m³/hr)	Length of agitated tank (mm)
DJ-75	25~35	≥3000
DJ-90	35~60	≥3000

IBRICK supply all types of mixer, our products apply in Russia, Kazakhstan, Uzbekistan, India, Bangladesh, Egypt, Angola, Mexico, Chile, Peru, Brazil and other countries.
