

Destacking Machine and Packing Machine

- Destacking machine will stack the fired bricks into the required place.
- Packing machine will pack the fired bricks with PET belt.

Destacking machine

Packing machine

Destacking machine

The machine is installed at steel track, stacks the bricks in the kiln car to the designated place through moving.

Destacking state

Equipment advantages:

This machine is with high degree of automatic and rapid stacking speed, so that it can effectively solve the problems of slow stacking speed.

Equipment parameters:

Model	Stacking Capacity (pcs/hr)	Power (KW)
XDJ	20000~24000	15

Packing Machine

Packing machine is equipment, using PET packing belt to automatically package the fired bricks, thus can reduce the packing cost and transportation cost, save the manpower to stack the bricks twice and save the area.

Pallet of bricks

Packed bricks

Primary structure: sending belt, retreat belt, disconnecting device, conveyer system, track rack, control device and etc.

Equipment advantages:

This machine with high degree of automatic and rapid packing speed, it effectively solved the problems of high packing cost, slow speed, high transportation cost, land and etc.

Equipment parameters:

Model	Stacking Capacity (pcs/hr)	Stacking dimension (mm)	Width of PET Belt (mm)	Thickness of PET Belt (mm)
XDDBJ-1	≥10000	≤1000X800X1000	16~19	0.7~1.3

IBRICK supply all types of discharging machine and packing machine, our products apply in Russia, Kazakhstan, Uzbekistan, India, Bangladesh, Egypt, Angola, Mexico, Chile, Peru, Brazil and other countries.
